PROFILE

Passionate and driven Front-End Developer focused on building responsive applications and engaging UI/UX experiences. I combine creativity and logic to deliver modern, user-focused digital products, backed by a solid foundation in React, React Native, and TypeScript. Complementing my software skills is hands-on experience in PC assembly, hardware maintenance, and troubleshooting—allowing me to solve problems across both software and hardware.

TECHNICAL SKILLS

Development	HTML5 / CSS, JavaScript, TypeScript, React, React Native, Expo, Framer Motion, Tailwind CSS, Vite, Supabase, Git
Design & Web	WordPress, Elementor, Adobe Photoshop, Responsive Design, UI/UX
Hardware & IT	PC Assembly & Troubleshooting, Computer Hardware & Maintenance, Networking Basics

PROJECTS

PetSOS — AI-Assisted Animal Rescue App

Thesis · Lead Developer

App-Based AI-Assisted Geolocation & Automated Response System for Community-Based Animal Rescue

- Built the mobile application from the ground up using Expo, React Native, and TypeScript.
- Implemented real-time incident reporting, geolocation tracking, and volunteer coordination flows.
- Integrated backend services and AI-assisted response support to turn reports into faster, organized action.

React Native · Expo · TypeScript · Geolocation · AI/ML · API Integration

PetSOS Landing Page

Live Website

pet-sos.vercel.app

Sleek, modern promotional site for the PetSOS app featuring an interactive GSAP-powered DotGrid background, fluid Framer Motion animations, and glassmorphism UI built with React 19 and Tailwind CSS.

React 19 · Tailwind CSS · Framer Motion · GSAP · TypeScript

WordPress Business & Pet Shop Sites

Live Websites

magnavalservices.com · warduzpetshop.com

Developed and deployed two responsive WordPress sites using Elementor—customizing themes, structuring service and product content, and refining the mobile experience across screen sizes.

WordPress · Elementor · Responsive Design · Theme Customization

Adventurer's Quest

Game Project

Built a 2D adventure game in Godot—designing playable encounters, scene flow, and interaction systems while iterating on level structure and the overall gameplay loop.

Godot · 2D Game Development · Scene Design · Gameplay Logic

EDUCATION

Cavite State University — Bacoar Campus

Expected 2026

Bachelor of Science in Computer Science

University of Perpetual Help System DALTA — Las Piñas Campus

Graduated 2020

Senior High School — ICT Strand
